

## TR8 Plus Pollutracker

ULTRA-SENSTIVE IN-FIELD CHEMICAL TRACKING

The Scentroid TR8 Plus Pollutracker is a complete air quality monitor and mobile laboratory. Your own portable chemical lab!

Users can measure ambient air quality & greenhouse gases due to it using up to 10 sensors and analysers including photo-ionization detectors (PID) sensors, non-dispersive Infrared (NDIR) sensors, electrochemical, and metal oxide sensors.

Each Pollutracker includes a built-in 10" touch- screen interface, on-device data logging, wireless transfer via email, remote (internet-based) firmware updates, built-in sampling pump, simultaneous data analysis of gases, built-in rechargeable battery, on-screen calibration procedure and an external decontamination device.

# ble

### FLEXIBLE AND COST EFFECTIVE SOLUTION

This instrument can measure all common contaminants including: SO2, CO, CO2, H2S, Methane, VOCs, Ethelene, PM2.5, PM10, and more. Visit our website at www.et.co.uk for a full list of sensors available. The chemicals and the range are selectable at the time of ordering.

### TR8+ PROGRAM

Graphic representation and reports are generated with the click of a button with this custom built software.

# Product specifications

### **POLLUTION THRESHOLD**

Pollutracker measures chemicals close to the detection threshold at parts per billion (ppb) levels

### **AUTOMATED DATA LOGGING**

Every Pollutracker provides automated continuous chemical, GPS position, tem- perature, and humidity data logging

### **SAMPLE BAG OR AMBIENT TEST**

Measures chemical composition of ambient air or sample stored in a PTFE, Tedlar or Nalophan bags

### **COMPANION EQUIPMENT**

TR8 Plus Pollutracker works great with our personal olfactometer SM100i, allowing user to record concentrations as well as detected vapours

### **INCREASED SAFETY**

By providing a constant reading of ambient air, users will receive added protection from over exposure to chemical vapours

### **MANAGED SAMPLE DEGRADATION**

Laboratories can manage sample degradation due to transportation and storage by analyzing values in-field instead of waiting for the laboratory

### **EVERYTHING YOU NEED**

The Scentroid Pollutracker includes a sampling pump with adjustable sampling rate, up to 10 chemical sensors, and our software application.

### **VAST ARRAY OF CABPABILITIES**

Measures temperature and humidity, records GPS position of each meas- urement, and measures directly from ambient air or from a sampling bag. Records continuously via bluetooth.

### Office Location

Kingfisher Business Park
London Road
Stroud
Gloucestershire
